

**Long and unplanned downtimes are lost profit...
A good reason for Durwen ServicePlus Technology**

DSP-Technology is the Durwen ServicePlus performance that gives maximum utilisation with a minimum of maintenance and repair cost. DSP-Technology allows quick and easy parts replacement by means of bolted modular key components.

The Durwen ServicePlus package is based upon decades of Expertise - Know How that benefits customers because DSP-Technology is extra profit without extra costs. DSP-Technology means short, managed maintenance intervals and reasonably priced replacement spare parts.

DSP-Technology is enhanced profit technology.

- DSP-Technology means:
- ▶ many common parts
 - ▶ reduced maintenance costs
 - ▶ wear parts with a first rate service life
 - ▶ excellent product service life
 - ▶ extended maintenance intervals
 - ▶ reduced maintenance work
 - ▶ maximum efficiency

Durwen ServicePlus
Technology that sets new standards in:
Economic Efficiency, Durability and Service

Using DSP-Technology
With a few tools and a few minutes all parts of a fork positioner can be exchanged.

- ▶ As few components as possible.
- ▶ As robust as possible.
- ▶ As easy to maintain as possible.
- ▶ As flexible and durable as possible.
- ▶ Giving our customers considerable advantages in cost efficiency.

Fork carrier replacement
Loosen piston nut, remove fork carrier and replace
Duration: abt. 10 min.

Valve replacement
Remove hoses, remove bolts, exchange valve and reassemble
Duration: abt. 15 min.

Sideshift cylinder replacement
Release hydraulic pressure, loosen hydraulic connections, replace cylinder and reassemble.
Duration: abt. 15 min.

Spare parts
Reliable and quick parts support

Service
Professional service available for you

Durwen forklift attachments
Intralogistics with ServicePlus!
Innovative · Efficient · Durable

Durwen is your partner for all questions concerning intralogistics with forklift trucks. The company founded in 1947 with its headquarter in Germany has operated in the mechanical engineering sector for more than 70 years and belongs to the leading suppliers of attachments for forklift trucks and other industrial trucks with its global sales and service network.

From the very beginning, it was extremely important for the still owner-operated family business to combine high quality standards with reliable and fast service in order to provide the best support regarding transport and handling demands for its customers.

That's why Durwen forklift attachments are particularly solid as well as compact and based on the specially developed Durwen ServicePlus technology (DSP). By using a reduced number of components as well as highly durable wear parts, DSP reduces maintenance and repair times providing maximum efficiency.

Well-trained skilled workers, engineers and technicians manufacture durable and versatile attachments with the help of high-precision CNC machines and robotics.

In close coordination with the customers, ideally adjusted solutions for individual requirements are developed. Hereby the company offers a constantly developing product range for virtually every application to its customers from all over the world.

Proficient consultation, consistent customer focus as well as high level servicing of sales and customer service have made Durwen the market leader

in terms of customer satisfaction for many years.

Durwen is certified according to ISO 9001:2008 and has a full certificate of welding suitability according to DIN EN ISO 3834-2:2006.

Durwen products comply with the EG machinery directives and the relevant EU norms as well as international standards.
