

Push Pull - Pusher

KA
AS

The **push pull KA** is designed to handle load that is placed on slip sheets. The installation is quick and easy due to fork pockets and quick couplings. The unit features a stable scissor mechanism and strong grip for the slip sheets.

The **pusher AS** does only push off load that is loaded on the platens.

- 1 hydraulic function required
- includes hoses and couplings
- other sizes upon request
- sheet saver upon request
- Multifaster coupling system upon request
- max. fork length 1220 mm
- max. fork section 150 x 50 mm
